

Dear Colleagues,

During the last decade, **Urological Stents** has gradually become a subspeciality, and meetings organized around this subject have become a place where the most updated news as well as the novelties in the field of urological stents are being discussed by the most prominent experts in the field.

This year, the Société Internationale d'Urologie (SIU), which will be holding its 31st Congress in Berlin, Germany, October 16-20, 2011 is hosting the Urological Stents Symposium during the first day of the Congress on October 16, 1300-1700. The Symposium will be chaired by Daniel Yachia. The Symposium Organizing Committee is putting together a very exciting program.

The programme will include podium presentations, roundtable presentations and a poster session. During these sessions, current and future practices of stent usage in the urinary tract by urologists working in different countries with different health care systems will be discussed.

Since the aim of the Urological Stent Symposium is to provide the most up-to-date information to its participants, the Organizing Committee will be happy to consider new proposals to include in the programme until April 15, 2011. Please feel free to contact the Chairman by e-mail with your proposals (yachia@zahav.net.il).

Please note that there will be no additional registration fees for the Urological Stent Symposium. Your registration to the SIU Congress in Berlin allows you to participate in the Urological Stent Symposium without pre-registration.

This meeting is rapidly approaching. We hope that we will have the pleasure to welcome you to Berlin.
